

# Aligning Technology for Best Business Results

Aligning Technology for Best Business Results has fast become a popular guide for companies trying to make the best use of new design, manufacturing, and information technology. According to the books authors, If companies are going to spend millions of dollars and countless hours to investigate, select, install, learn, customize, use, and manage technology tools, they ought to have better business results for the effort. Based on the results of a best practice study of leading manufacturers, Aligning Technology for Best Business Results gives a powerful new approach for companies to tie their information technology selections to business needs.
