

Hong Kong in China: The Challenges of Transition

The dramatic handover of Hong Kong to the Peoples Republic of China on July 1, 1997, amid much tension and speculation, closes one significant colonial chapter in Asia. At the same time, it also sets the stage for new political and economic possibilities with China closely involved with a key financial center in Asia. Hong Kong in China comprises a collection of papers evaluating the situation in Hong Kong SAR over the last two years. The handing over of Hong Kong to China presents a challenge to the legal system which is intrinsically and delicately linked to the political vision of one country, two systems. While politicians and legalists seek to work out the model, the people of Hong Kong confront the dilemma of an identity crisis, on top of the contentious social problems presented by the immigration of Chinese mainlanders.
