

For Women Only, Book 1: Healing Childbirth PTSD and Postpartum Depression with Parts Psychology (Volume 1)

For Women Only, Book 1 is the first in a series of books devoted to exploring womens issues in psychotherapy and counseling. This first book describes the treatment in just six sessions of one womans struggle with childbirth so painful it produced PTSD. Eight months of postpartum depression followed the birth before she found effective psychotherapy treatment. Other volumes will address emotionally and physically painful experiences with the menstrual/ovulation cycle, the trauma of miscarriages and stillbirths, and the effect on women of their partners porn addictions. Book 1 describes the treatment of postpartum depression and childbirth PTSD with Parts Psychology, a therapy that emphasizes work with the hidden parts (self-states, ego states, subpersonalities) of the whole person. These are the parts we refer to when we say A part of me wants to leave him but another part cannot imagine life without him. For Catherine, the 34-year-old mother who is the subject of the therapy, the two most important parts were Catherine 22, a younger part who filled the role of an angry Catherine, and Medusa, a snakes-as-hair version of Catherines mother. Therapy included both reducing the anger of Catherine 22 and neutralizing the effects of the Medusa introject, an unconscious representative of many negative traits of the patients mother. Catherines emotional issues were compounded by her mothers rejection of her at the beginning of her pregnancy. Once her best friend, her mother became a continuing thorn in her side by refusing to speak to her throughout her pregnancy. The narrative describes how the mothers negative influence in Catherines life was diminished through therapy. Positive results were confirmed through testing of Catherines pre- and post-treatment symptoms. The narrative of Catherines therapy illustrates how the Parts Psychology model provides an effective

blueprint for bringing rapid relief and healing of a woman's childbirth and postpartum issues. The second half of the book contains the excerpt of Chapter 1 of the authors book, Parts Psychology: A Trauma-Based, Self-State Therapy for Emotional Healing.
