

Inside the Third World: The Anatomy of Poverty

The third world war will probably start in the Third World. To the old familiar stories of disasters, coups and corruption has been added the new tension of superpower confrontation. Paul Harrison has provided a comprehensive guide to the roots of mass poverty, to the social strains and political instability that turn one Third World country after another into dangerous flashpoints - an ever-growing threat to the world's peace and prosperity. From climate and colonialism, through land hunger, exploding cities and unemployment, to over-population, malnutrition, disease and illiteracy, the wealth of facts and analysis is brought home in first-hand, often harrowing accounts of the realities of life for poor people and poor communities in Asia, Africa and Latin America.
