

The Sci Fi Freaks Guide To The Televisual Galaxy - The Supernatural Shows

Ghosties and ghoulies and long legged beasties and things that go bump in the night. We have long had a fascination for scary stories ever since men huddled round fires in their caves and listened to the tales of their shamen. Television, never a medium to buck the trend, has embraced the supernatural in recent years and now there is a stream of shows starring demons, werewolves, vampires, ghosts, people who see dead people, witches and all manner of otherworldly forces. This themed volume of The Sci Fi Freaks Guide To The Televisual Galaxy puts together all of the supernaturally themed shows into one slimmed down volume for those who aren't interested in all that messing about in space stuff. Here are the good, the bad and the ghoulish of scary supernatural telly with the likes of Angel, Buffy The Vampire Slayer, Medium, Supernatural, The Vampire Diaries and so many others. (These shows are also featured in The Sci Fi Freaks Guide To The Televisual Galaxy main book)
