

REFLECTIONS

The IT industry, arguably like no other, has been in the forefront of transforming directly and indirectly the urban landscape and lifestyles in India in the last 2-3 decades. Needless therefore to mention, many a book has been and continues to be written about it most related to the business and management side of it or to the technical side. This book does not purport to address either of those segments. Instead it takes a humorous look at some of the business-as-usual facts and practices in the IT industry. The book is a compelling read for all IT professionals veterans or tyros or aspirants and to non-IT persons as well. In a refreshing departure from the routine, the author gives an insider view of things in a typical IT organization. The topics are in no particular order, although, the racy style laced with interesting and hilarious anecdotes, make it worth a read in probably a single session. Behind every laugh evoked is a message subtly conveyed.
