

## Strategies for Teaching Learners with Special Needs (4th Edition)

This comprehensive book is non-categorical in focus, viewing instructional methods and all curricular content areas in the special education field. A valuable tool for teaching students in resource and self-contained classrooms, this book is a current presentation of instructional challenges involving students with special needs. Contemporary themes include inclusion, collaboration, cooperative teaching, strategy training, the importance of phonological awareness, holistic perspectives, home-school collaboration, ethical issues in the education profession, transition, and educational outcomes. Expanded coverage on new research discusses phonological awareness as a basis for successful reading, transition planning and life skills instruction, collaboration with professionals and paraeducators, and effective strategies throughout the curriculum. A second chapter on reading significantly increases the attention given to issues in reading instruction, the phonological basis for successful reading and students with special needs, and the promotion of effective comprehensive instructional strategies. Practical chapters emphasize teaching study skills, developing social skills and self-determination, teaching the creative arts, and teaching science and social studies in addition to the core academic areas of reading, writing, math, and spoken language. For educators teaching learning disabled students.
