

Open-Ended Creationism: Thinking Outside the Box of Time

One of the most puzzling questions known to man is simply, How old is the earth? Educators teach their opinions. Scientists advance their ideas. And theologians present various biblical interpretations. Christians are especially interested in this question for obvious reasons. But that doesn't mean Christians are all in agreement on the topic. Far from it. Sincere believers interpret the days of creation differently, as well as the evidence in science. Whether you believe the earth has been around for billions of years, or only thousands of years, this book will challenge some of your presuppositions. And you may be surprised to learn the truth about the beginning of the first day and the conclusion of the seventh day of creation. Its time to take a fresh look at this important question through the lens of Scripture. You see, there is no one better to help us investigate this mystery than the One who created the earth outside of time. Open-Ended Creationism moves the discussion beyond the scientific data, and brings it all back to what God told us about creation in His Word. At the end of the day, the Bible is not a science textbook. Instead, it provides a glimpse into a realm that eclipses science, human reason, and even time itself. If you are ready to see how Scripture addresses the age of the earth, then welcome to this adventure into time and eternity. I am glad you are here, and I am convinced that your Creator is too.
